

AUTOMATICALLY IDENTIFYING LINKS DISPLAYED BY A BROWSER THAT IS
BEING USED BY A USER THAT POINT TO PAGES OF WEB SITES SELECTED
AS BEING OF INTEREST TO THE USER

ABSTRACT OF THE DISCLOSURE

A facility for analyzing a web page is described. The facility receives the web page. For each link occurring in the web page, if the link points to a web site previously indicated by a user as being of interest, the facility modifies the web page to identify the link as pointing to a web site of interest.
